

## 【Summary of Initiatives】

**1 As Yonezawa City is situated near the source of the Mogami River, we will take the responsibility to make sure that plastic doesn't pollute the rivers and oceans by increasing awareness and creating an environment where we do not litter or lead others to do so.**

**2 We will urge citizens to decrease their consumption of single-use plastics, and instead to use their own shopping bags, water bottles, and chopsticks. Also, we will work together with businesses to encourage them to decrease their consumption of single-use plastics.**

**3 We will strengthen our environmental education and disseminate information encouraging "ethical consumption," re-evaluating our lifestyles to be consumers with consideration for the environment, people, the region, and society.**

**4 We will urge citizens to properly sort plastic trash, promote recycling, and decrease waste.**

**5 Citizens, business owners, and the government of Yonezawa will work together, and, with the power of creativity, challenge ourselves to create a zero plastic trash environment.**
